

Project Executable Files

Date	14 th July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	No
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
Smart-Lender-project/
|
├── Dataset/
│   └── loan_prediction.csv
|
├── Flask/
│   ├── static/
│   │   ├── style.css
│   │   └── app.js
│   ├── templates/
│   │   ├── home.html
│   │   ├── index.html
│   │   └── result.html
│   ├── app.py
│   ├── loan_model.pkl
│   ├── requirements.txt
│   └── Procfile
|
├── README.md
└── .gitignore
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://acurate.onrender.com
Login Credentials (Demo)	No user name and password required
Platform / Hosting Provider	Render
Repository Link	https://github.com/hareeshvavilapalli/Smart_lender_Approve
Demo Video Link	https://drive.google.com/file/d/1IdBb9YjMi8jkgLprV6cKjuKhXx7vvulp/view?usp=sharing

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites

- Python 3.8 or above
- pip
- Flask
- Required Python libraries

Step 1

Step 1

Clone the repository.

```
git clone https://github.com/hareeshvavilapalli/Smart_lender_Approve.git
```

Step 2

Navigate to the project directory.

```
cd Smart_lender_Approve
```

Step 3

Install dependencies.

```
pip install -r Flask/requirements.txt
```

Step 4

Navigate to the Flask folder.

```
cd Flask
```

Step 5

Run the application.

```
python app.py
```

Step 6

Open your browser.

```
http://127.0.0.1:5000/
```

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on the quality of the training dataset.	Can be improved by using a larger and more diverse dataset
2	The application predicts only loan approval status.	Future versions can include EMI calculation and credit score analysis.
3	User authentication is not implemented.	Can be added in future updates for secure access.
